**Alle im aktiven Dienst befindlichen amerikanischen Astronauten** können über die nachfolgende Anschrift erreicht werden:

- **Johnson Space Center, Astronaut Office, Code CB, Bldg. 4S, 2101 NASA Parkway, Houston, Texas 77058-3607, U.S.A.**

Diese Namen tragen in der nachfolgenden Liste lediglich die Zusatzangabe "JSC". Nutzlastspezialisten sind ebenfalls via JSC erreichbar, hier ist jedoch die Bezeichnung "Payload Specialist Office, Code CB, Bldg. 4" zu benutzen.

This list contains very detailed data, sometimes home addresses and phone numbers. Important: DO NOT INVADE THE PRIVACY OF AN ASTRONAUT. Do not visit their home, do not call for your autograph. Preferably use the business address, always enclose return postage and possibly a stamped and addressed envelope. Be polite, polite and polite. Astronauts do not owe us anything - granting an autograph is a favour, not an obligation.

## From the bookshelf ...

As in any hobby or profession, sound information is a source for success. Thus, you are more likely to raise the attention of an astronaut when you show intimate knowledge of what they did and do than if you just ask "please send me your autograph". With well informed and touching letters, you might even have success with someone who normally ignores autograph requests. Just recently a number of reference works have appeared on the market, and while not being particularly cheap, they represent a worthwhile investment for every serious autograph collector.

**Michael Cassutt, Who's Who in Space 3; Macmillan Prentice Hall 1999, ISBN 0-02-864965-6, $ 110**
The newest and already from this aspect the best book on astronauts and their background. This book has photographs, and it is a solid work of genuine scientific research by Mike Cassutt and his co-authors Rex Hall and Bert Vis. Cassutt's book is the ultimate resource for the collector - there is no more thoroughly researched and up to date book at the market at this moment.

**Douglas B. Hawthorne, Men and Women of Space; San Diego/Calif. 1992, ISBN 0-912183-08-X, $ 90**; to be ordered from Univelt Inc., P.O. Box 28130, San Diego, Calif. 92198, USA (out of sale)
This now somewhat outdated oeuvre of more than 900 pages contains concise biographic sketches of everyone who has ever been selected as an astronaut candidate, even from the most remote programs. US, Soviet and third country astronauts are covered. Hawthorne did a tremendous amount of work with the Americans and Western astronauts with an incredible number of details not yet found anywhere else. Only in respect to the Russians, he did little research on his own, but gathered all the information available on the market. Sorted in alphabetical order, this book is a most useful standard reference work. The only disadvantage: there are no photographs.

## How can you stay up to date with astronaut addresses?

One thing for sure: nothing outdates faster than addresses of individuals. People change jobs, move around, get divorced, you name it. No address list, as good and well researched as it might be, will be able to keep up with these changes as they happen.

However, I'm trying the best I can, and in many cases I am able to provide a new address days after I learnt about the old one being obsolete. How could you, as a buyer of my list, keep up with these changes? There are a number of possibilities:

1. **Buy a new list**. A new printout is made about every 6-8 weeks, including all the amendments entered in the meantime. While each time there are about a dozen minor changes (new mail code, new rank, ....) that certainly do not warrant spending an extra $15, there are usually about half a dozen real changes: new addresses, recently recruited astronauts etc. It would certainly exceed the needs of the average collector to buy a new list every six weeks, but it might be a good idea to get the list twice a year.

2. **Look out for newsbits where I publish them:** Principally, there are two places where I am regularly publishing new addresses and address changes:
   - 2.1 For the German astrophilatelistic club "Weltraum Philatelie e. V.", I publish a newsletter with important bits and pieces (launch dates, new postmarkers, new covers, etc.). Astronaut addresses are a part of the information provided there. Of course the newsletter is in German, but there is little to be translated with an address. You have to be a club member to receive this newsletter. Annual fee is DM 40, and you get six thick background bulletins as well. Additional costs for the newsletter: postage (depending on destination). For more information, an application form and samples, just write to me
   - 2.2. A regular column with updates and changes is published in *Astrophile*, the bi-monthly of the *Space Unit*. For more informations on the *Space Unit*, contact their Secretary, Carmine Torrisi, P.O. Box 780241,

Maspeth, NY 11378, USA. E-mail: ctorrisi@aol.com

3. **Online information:** I have now created my own Internet list to facilitate the contact with my customers and collector friends alike. This new list is located within Yahoogroups, and its purpose is to exchange fact based information, experience and analysis. We will exchange experiences about which addresses work and which don't, which are the latest modifications, and where we can meet a real astronaut in nearby places. English is the main operating language of the list; however, other major languages like German, French, Spanish are warmly welcomed. How can you join? First of all: it's free. All you need is access to the Internet. To learn more about the Astroaddies group, please visit

http://groups.yahoo.com/group/Astroaddies

and apply for membership. As soon as your application is confirmed, you will be able to join this ever increasing community of collectors and keep yourself informed.
